FAST, FASTER - RASANT

RASANT TURBO

Discover the possibilities given by the ultra-spinny RASANT topsheet! React on your opponent's topspins by playing harder and more dangerous counterspins! Carry spin and speed to extremes! Play topspin strokes with an enormous quality and absolute precision! Increase the dynamic of your strokes by using the massive power which is hidden in the unique explosive green RASANT sponge! Use the advantage! Install the update - now! Play RASANT TURBO!
 ▶ For offensive performers who score by skillful topspins and spinny strokes!

Thickness: 1,7 / 1,9 / 2,1
 112216 red / black

€ 47,95

RASANT POWERSPONGE

Be proactive and play RASANT POWERSPONGE! Experience the fusion of long-lasting delight in playing and huge control provided by the soft sponge's elasticity.
 Be creative: change between distances and strokes at your discretion! Act outstanding when playing passive and score when playing active!
 Take advantage of the soft, maximum controlled playing feel caused by the unique green RASANT sponge! It absorbs the energy of the arriving stroke and converts it into your own massive power! Spin, speed and high control - is this your maxim? Then play RASANT POWERSPONGE!
 ▶ For creative offensive players who pull out all the stops to score!

Thickness: 1,7 / 1,9 / 2,1
 112217 red / black

€ 46,95

RASANT

Experience RASANT's compact play feeling caused by the unique, fine-pored green sponge! Disarm your opponent's spin by using the newly developed RASANT top sheet and kick-start your own, more dynamic topspin!
 Step up your stroke efficiency! Trigger toxic, better spins with an aggressive spin curve!
 Change the game to your favor! Take your performance to a higher level! Play RASANT by andro®!
 ▶ For offensive players heading to success by powerful topspins!

Thickness: 1,7 / 1,9 / 2,1
 112215 red / black

€ 46,95

RASANT TURBO IDEAL ACCELERATION

RASANT POWERSPONGE FANTASTIC GAME EXPERIENCE

RASANT COMPACT PLAYING FEEL

The new andro® RASANT rubbers. Rubber technology on highest level!

RASANT CELL STRUCTURE

SPIN FACTOR SIMULATION

With the RASANT technology andro® redefines the power level for speed and spin.

The rubber technologies' potential shows off by the two new RASANT variants TURBO and POWER-SPONGE. Through intensive research for high performance material a unique sponge structure with superior dynamic has been developed. RASANT TURBO bases on a special rubber surface design resulting in higher ball grip - full power for more spin and speed! RASANT POWERSPONGE impresses with controlled playing feel and high sponge elasticity.

HEXER HD

MORE PRECISION – HIGH DEFINITION PERFORMANCE

- Excellent energy transfer through innovative sponge-structure!
 - Natural caoutchouc surface - for longer durability!
 - More grip resulting from the surface's new developed micro structure!
 - More speed!
 - More fierceness for your game: The new High Definition Microstructure for more precision and spin!
- ▶ For players who define themselves with Spin, Speed and precise strokes!

Thickness: 1,7 / 1,9 / 2,1
112208 red / black

€ 44,95

HEXER POWERSPONGE

Thanks to this HEXER version also players with preference for soft rubbers and sensational speed glue sound (SOUND PERFORMANCE) can benefit from the advantages of the fourth Tensor generation. The in-bound rotation energy is absorbed by the rubber and immediately gets transferred to active out-bound energy. The soft Powersponge generously forgives slight mistakes regarding optimum ball hitting area resulting in outstanding control characteristics. The excellent ball feedback provides additional confidence while hitting the ball.

▶ For players of all levels wanting to experience speed and loud sound sensation without missing control!

Thickness: 1,7 / 1,9 / 2,1
112268 red / black

€ 43,95

HEXER HD HIGH DEFINITION PERFORMANCE

HEXER POWERSPONGE SOUND PERFORMANCE

HEXER +

Are you looking for a rubber whose strength is comfortable ball feedback? Whose speed consistently puts pressure on your opponent and adds unimagined precision to your game? Then go for HEXER+ ! The new recipe of the upper layer combined with the progressive pips geometry gives HEXER+ a strong trampoline effect and a comfortable flat ball rebound angle. Thus the ball can faster make its way to the target – this enables the player to generate more pace while less energy is needed (PACE PERFORMANCE). The HEXER-sponge of the fourth TENSOR-generation provides the dynamics you search for and strokes from all table distances will be routine.

► For players whose own versatility is their key to success!

Thickness: 1,7 / 1,9 / 2,1
112261 red / black

€ 43,95

HEXER

Players in search of a rubber for whirling topspins will be enthused by HEXER. The mixture of 100% natural rubber in the upper layer results in increased grip and a longer impact time. This effects in improved trampoline and redation features for the same striking energy (EFFICIENT PERFORMANCE), and provides each topspin with a higher trajectory. In addition, the new and progressive pips geometry puts a compact playing feeling across. The fourth TENSOR generation unfolds its immense qualities in spin and redation oriented play.

► For the spin-oriented offensive player!

Thickness: 1,7 / 1,9 / 2,1
112260 red / black

€ 43,95

HEXER DURO

HEXER DURO is designed for all players who demand from their rubber strong spin and speed characteristics combined with very good durability. The 100% natural caoutchouc upper layer and the medium-hard sponge in HEXER technology give access to a very broad range of strokes: the sticky upper layer provides a prolonged ball contact time – thus the player leads the ball longer and experiences more control during passive as well as during active strokes. The highly developed endurance enables a later change of rubbers which is comfortable and economic. This has made the HEXER DURO earn the rating LONGLASTING PERFORMANCE.

► For players of all levels, who prefer long-lasting rubbers with constant playing characteristics and technical durability.

Thickness: 1,7 / 1,9 / 2,1

HEXER PIPS+

HEXER PIPS+ is a fourth generation TENSOR rubber providing a very comfortable feeling when you smash and hit which is caused by the soft sponge made of 100% natural rubber and the narrow pimples. Stable feedback for passive strokes with huge power reserves. The very special feature of HEXER PIPS+ is the option to choose between a lengthwise and a crosswise pimple geometry (ECLECTIC PERFORMANCE). Focus on: gentle control or non-stop aggressiveness!

Thickness: 1,7 / 1,9 / 2,1
112273 red / black

€ 43,95

HEXER PIPS FORCE

Force stands synonymically for energy and strength. Providing a high bandwidth for offensive action your opponents will be forced to play just an underpart in the game. The medium sponge, based on the latest HEXER technology, gets across a maximum of control, whereas the typical HEXER PIPS ball jump will lead you to success. The protected 0/90-technology allows you to choose HEXER PIPS FORCE according to your playing system. Lengthwise for more speed and vigour, crosswise for more control when blocking.

► For those seeing their own many-sidedness as the key to success!

Thickness: 1,7 / 1,9 / 2,1
112274 red / black

€ 43,95

HEXER PIMPLES WITH 0/90 POWER

WU JIADUO

HEXER PIPS

HEXER rubbers have been well received by many players all over the world. This is why we bundled all the positive "HEXER characteristics" to put it into HEXER PIPS! The first pimple-out rubber by andro® that bases on a fourth generation TENSOR sponge. The rubber mixture of 100% natural rubber serves HEXER Pips with a high durability and long lasting stability, while the soft sponge keeps speed and control on an exquisite level. Moreover HEXER PIPS is a highlight on the pimple-out rubber segment as it combines two different geometries in one rubber! We call it ECLECTIC PERFORMANCE, as the user can choose between a lengthwise and a crosswise geometry.

Thickness: 1,7 / 1,9 / 2,1

HEXER PIPS FORCE

HEXER PIPS +

HEXER PIPS

Made in Germany

THE 0/90 PRINCIPLE - DUAL POWER.

Protected 0/90 technology. andro® rubbers with this imprint have a mold on two differing sides:

Gluing the rubber in the 0° version MORE SPEED is generated.

Using the 90° version the CONTROL FACTOR gets backed up.

SHIFTER

andro® SHIFTER – This rubber has what it takes to become a classic! Its very spinnny, hard surface and the flexible medium sponge build up the core of this rubber. Excellent spin, control and pleasant speed are the results, when surface and sponge are interacting with each other. Every player type can take advantage of these characteristics – no matter if you prefer a passive playing style or powerful offensive strokes. andro® SHIFTER's unique advantage is the possibility for you to chose between two different ways to assemble the rubber: 0° for more speed, 90° for more spin and control. The sum of these characteristics make andro® SHIFTER a real star among all-round rubbers!!

► For the classical offensive player!

Thickness: 1,3 / 1,5 / 1,7 / 1,9 / 2,1
112205 red / black

€ 32,95

SHIFTER POWERSPONGE

andro® SHIFTER POWERSPONGE is the ideal choice for players who put their focus on control. Its soft and elastic sponge provides an excellent service regarding fault tolerance and it makes andro® SHIFTER POWERSPONGE become indispensable for youngsters that are learning new techniques. More experienced players take advantage of the combination of high control and the spinnny surface that permits a variable playing style. Furthermore it leads passive as well as offensive strokes to their targets, no matter how difficult they are. Beyond that andro® SHIFTER POWERSPONGE gives you the ultimate choice between two mounting options (0° or 90°).

► For maximum control!

SHIFTER POWERSPONGE

ROXON - ROCKS ON!

ROXON 500 PRO

The top athlete is our most critical customer. Right he is because his level of playing table tennis is so sophisticated that he is also setting high standards for his body and his material. The ROXON 500 PRO is designed for exactly this technically elaborate high-class player. Due to an optimised surface net structure the player can generate utmost stroke dynamic with this rubber. Precision and stability, broad sound and an exercise book flying curve: that these effects can be reached with speed-glue only belongs to the past from now on. ROXON is the future!

► For the absolute top-player!

Thickness: 1,8 / 2,0 / max
112256 red / black

€ 41,95

ROXON 450

The demand for the material is growing with the playing level. With his balanced technical skills the player of the ROXON 450 is able to ideally control this rubber's power and dynamic. The athlete benefits from the reduced rubber weight of the ROXON 450 by faster and more precise arm movements. The stabilisation in the molecular caoutchouc layer results in a high abrasion resistance - long endurance and a shiny surface are the impressive evidence. The rebound effect will inspire all former speed-gluing players also during non-centred hits. The secret lies in the rubber mixture, not in the glue!

► For ambitious players of all playing levels!

Thickness: 1,8 / 2,0 / max
112255 red / black

€ 41,95

ROXON 330

ROXON 330 impressively exposes that the characteristics soft and fast are not contradictions. The established ROXON surface with its extraordinary rubber compound (stabilised caoutchouc tissue) combined with a soft sponge, pointing up the dynamic factor to a new limit. You will immediately recognise the result: An unprecedented precision on all strikes. A more upward flight path, an excellent sound as well as a detailed feeling of the ball are the main ROXON 330 features, leading to a fine control for every player. More power in active play and coincidentally more authority in passive play! This characterises ROXON 330 as a rubber that makes winning for player of all categories easier.

► For maximum sound!

Thickness: 1,8 / 2,0 / max
112254 red / black

€ 41,95

ROXON 500 PRO

ROXON 450

ROXON 330

PLASMA 470

The most powerful of the three PLASMA rubbers is specifically designed for the top class player. Despite its middle hard sponge the PLASMA 470 provides a soft and controlled playing feeling. During fast topspin strokes it is clearly the PLASMA rubber with the biggest power! The improved rubber mixture provides more consistency of the playing characteristics and extreme abrasion resistance!

► For high-class players.

Thickness: 1,8 / 2,0 / max
112240 red / black

€ 39,95

PLASMA 430

The PLASMA 430 will appeal to every player right from the beginning. The sponge is 5 degree softer compared to the 470. In combination with its high performance upper layer every topspin ball will get an immediate fantastic acceleration. One can feel this from the tremendous trampoline effect – also during slower strokes. The PLASMA 430 is designed for the top athlete as well as for the mid- to lower-class player to whom HI-TECH rubbers are a great new alternative.

► For players of all levels.

Thickness: 1,8 / 2,0 / max
112239 red / black

€ 39,95

PLASMA 380

The PLASMA 380 will inspire all players searching for an ultra soft and super elastic attacking rubber. The 380 convinces by its extraordinary good control for the ball and it acts extremely mistake forgiving particularly for youth players. The speed level suits lower class players best as they will be able to control the 380 also in difficult situations without a problem.

► For mid and lower class players.

Thickness: 1,6 / 1,8 / 2,0 / max
112238 red / black

€ 39,95

REVO FIRE

Maximum sweet spot + powerful topspin strokes TENSOR - not only more speed, more power and speedgluing sound, but also more spin and more feeling! The exceptional feeling of TENSOR rubbers is core of the REVO FIRE. The sponge absorbs the energy of the appearing ball when the player hits the ball and immediately new energy is released. This effect, responsible for the special feeling, enables every player to have a very good control with the REVO FIRE. The medium adjusted sponge implements accents in active as well as in passive playing situations by demonstrating a brilliant catapult effect. One can play fast and precise topspins and in decisive moments REVO FIRE offers its existing speed reserves in order to directly achieve the winning point.

► Ideal value-for-money for everybody!

Thickness: 1,7 / 1,9 / 2,1
112262 red / black

REVO FIRE

IMPULS POWERSPONGE

Looking for the complete package of speed, spin and excellent ball-control? Then choose IMPULS POWERSPONGE!

By ideal matching of these characteristics you get an easily control-able rubber that provides enormous tempo reserves. A very sticky surface combined with the soft, large-pored sponge of the newest TENSOR-technology, allow easily dirigible strokes and a high degree of control. Your goal to outmaneuver opponents will become child's play. The extreme TENSOR sound will give you additional feedback for a more precise ball-moment.

► For mid and lower class players.

Thickness: 1,8 / 2,0 / 2,2
112214 red / black

€ 39,95

IMPULS SPEED

The IMPULS SPEED releases significantly more speed and spin than the successful Impuls rubber – without losing control! The character of the IMPULS SPEED combines two rubber types: the very soft sponge absorbs the opponent's speed in the passive control play very well. In the active playing modus it enables to more energy. The strong sound and improved ball handling will impress every player immediately. Experience fewer mistakes due to the extra high flying curve and bigger ideal hitting area! The IMPULS SPEED can be managed without effort also when practising less.

► For mid and lower class players.

Thickness: 1,8 / 2,0 / 2,2
112246 red / black

€ 37,95

IMPULS

IMPULS is manufactured in a modified TENSOR formula and is therefore softer with a higher elasticity than traditional rubbers. It absorbs energy when playing passively and releases energy during active playing. Slice or block or smash, the 30 degree soft sponge provides the right amount of absorption for every speed. When attacking with spin or smashing, this „allround“ TENSOR construction produces power, resulting in higher ball flight velocity while making the balls fly more precise like a vario-rubber.

► For mid and lower class players.

Thickness: 1,3 / 1,5 / 1,8 / 2,1
112204 red / black

DAMIEN ELOI

BACKSIDE 2.0 D

andro® BACKSIDE 2.0 D is a rubber which is made for an offensive playing style that is based on control and spin. Effective offensive strokes can be played easily with this rubber which is furnished with a sponge of 40°. The outcome of this is a nice catapult effect which enables you to convert your opponent's bad returns into big points at any time. In 1,3mm or 1,5mm ideal for allround players, from 1,7mm on appropriate for topspin players- thus you are definitely right when you name andro® BACKSIDE 2.0 D a multi-talent.

► The Allrounder!

Thickness: 1,3 / 1,5 / 1,7 / 1,9 / 2,1
112211 red / black

€ 32,95

BACKSIDE 2.0 C

As a defender you are reliant on rubbers with a maximum of feeling and fault tolerance. andro® BACKSIDE 2.0 C offers you exactly these important characteristics! The extremely spinny, almost sticky surface allows precise balls full of rotation that will drive your opponent crazy. You can always count on BACKSIDE 2.0 C, no matter which distance from the table you are forced to return from or which situation you are stuck in. As andro® BACKSIDE 2.0 C is available from 1,1mm on it is the ultimate choice for defenders who set value on rubbers with a lot of control and with a huge range of use.

► For the defensive allrounder.

Thickness: 1,1 / 1,3 / 1,5 / 1,7 / 1,9

€ 32,95

BACKSIDE 2.0 D

BACKSIDE 2.0 C

BLOWFISH

Already after short adaptation time, the short pimples of the BLOWFISH are your weapon to set every opponent under pressure. The new type, aggressive pimple design successfully creates topspins as well as effective block and counterattacking strokes. In combination with the innovative TENSOR technology, BLOWFISH thrills by an output of speed, not yet experienced with short pimple rubbers. Furthermore, the feelingly soft sponge causes utmost sensibility, ball contact feedback and control. As a result, your performance is accompanied by a huge variety and is extremely unpredictable for your rival.

► Soft, fast + variable!

Thickness: 1,8 / 2,0 / max
112264 red / black

€ 36,95

BLOWFISH +

Due to its slightly harder sponge BLOWFISH+ supports the offensive ambitions of the pimple out player efficiently. Based on unusual broad pimples and the medium-size sponge, this type offers an explosiveness that in a jiffy turns every block into an effective shot. Another highlight of this pimple geometry is the extreme stability. It prevents the pips from bending down while the ball is hit thus it enables topspins with good spin. While conventional pimple-out rubbers could only offer these features along with a distinct loss of control the BLOWFISH+ shows strength also in passive playing situations.

► For aggressive Attack!

Thickness: 1,8 / 2,0 / max
112265 red / black

€ 36,95

CHAOS

TENSOR long pimple - power!

The modern defensive player is always focussed to present an impressive „adequate response“ all the time. According to the needs of this player's type, andro® has developed the long pimple rubber CHAOS. The built-in TENSOR technology guarantees the most of safety and backs up the defender in all positions. The ability to create surprisingly slice variations and dangerous, annoying strokes generates andro® CHAOS into an unpredictable top-rubber for every opponent. The version with a thin sponge offers further speed reserves; thus, enabling attacking strokes near the table whenever you want. This modern rubber composition guarantees a lot of joy in playing and often faces the opponent with insoluble problems.

► Unpredictable strokes from every distance.

Thickness: 0X / 1,2
112266 red / black

LOOM POWERED BY NATURE

Time never stands still for the andro® blade development team. Our developers do research continuously for new and exciting fibers and finest materials.

The new Nature Powered Fibre (NPF) Composite is a trend-setting innovative material that bases on a natural fiber which is being produced in an environmentally friendly way.

Last but not least the playing characteristics of andro® ProLoom and andro HiLoom are absolutely convincing:

- ▶ Carbon-like playing characteristics
- ▶ High energy-absorption of the incoming ball
- ▶ Best possible transmission of your own power onto the ball
- ▶ 100% Feedback

Manufactured in an environmentally friendly way

KINETIC RECORD

KINETIC HANDLE WITH
NANO CARBON PELLETS

INVERSE IMPULSE

Kinetic, the yet only dynamic and truly effective system worldwide!

When the ball impinges on the bat, carbon balls - the kinetic mass - are moved explosively into the hitting direction. The kinetic mass passes a power impact (1) in the hitting momentum being inverse to the ball (2). This dynamic counteraction neutralizes vibrations and maximizes power, control and ball feeling. The faster the ball, the bigger the effect generated by the counter impact of the kinetic mass.

PLAY

KINETIC RECORD OFF+

The KINETIC RECORD OFF+ evolved from a long tradition of outstanding high speed blades by andro®. Designed for modern and speed focused table tennis this blade never lets you run out of control due to the Kinetic system which is integrated into the handle. The combination of fine plywoods has been tested in several test series and reached remarkable results in terms of speed and control. Furthermore this classy composition, the neat workmanship and the precise bonding of the layers provide a very special playing feel which is usually experienced with blades which are much heavier and thicker. The ideal instrument for players who use to play close to the table and who let the opponent feel the complete measurements of the table by playing precise and hard topspin strokes. Weight approx. 85 g.

CS7 TOUR OFF

Compared to the PRO the CS7 TOUR is furnished with additional speed resources. The key to the noticeable power is the layer of Limba outer-plywood. Core- and intermediate plies in different thickness were perfectly matched together. Created for players who do not blow an easy point and constantly put pressure on the opponent with topspin strokes. Weight approx. 90 g

CHASE YOUR OPPONENT OFF THE BOX

TREIBER Z OFF

By introducing TREIBER Z andro® completes the TREIBER series by adding a new unique high-class blade with a built-in artificial fiber. Make your own experiences and feel the soft impact harmonizing with the hardness and the stability provided by the Z-fibre. Extraordinary ball-feeling for playing solid and constant blocks or to let off dangerous spin-monsters on your opponent. Best possible balance and special top-heaviness enable you to bring the ball to its target easily. A real multi-talent! Weight approx. 88 g.

10227401	STRAIGHT	
10227402	CONCAVE	
10227403	ANATOM.	€ 109,00

TREIBER G OFF

Developing TREIBER G much focus has been laid on best possible balance between control and speed. Compared to other synthetic raw material G-fibre is more flexible and emerged as a real multi talent. It enables hard topspins and winning points as well as backing up the short play over the table by providing enormous feeling. The modern layer succession maximizes the strike zone of the nobly processed blade, whereas the G-fibre is positioned directly behind the outer veneer. The blade for any player looking for a synthetic blade keeping himself grounded. Weight approx. 90 g.

10227001	STRAIGHT	
10227002	CONCAVE	
10227003	ANATOM.	€ 59,95

TREIBER H OFF

The high-tech synthetic H-fibre interlayers are positioned directly around the Koto core-veneer. This makes the difference to ordinary synthetic blades. The characteristics of the timber veneer come to the fore resulting enormous ball feeling and control. Especially spin-oriented strokes and the service-return-play take advantage of this. Powerspins from any position become possible and work up your opponents' sweat. An extraordinary blade for extraordinary sensitive players! Weight approx. 90 g.

10227201	STRAIGHT	
10227202	CONCAVE	
10227203	ANATOM.	€ 69,95

TREIBER K OFF

TREIBER K is a high-end blade of the top category. The efficient and top modern K-fibre which is positioned directly under the Koto outer veneer generates dynamic topspin strokes also for not perfectly centric hit balls. Disturbing vibrations through wrongly hit balls are completely absorbed by the K-fibre. What's left is a sensitive impact, never losing its control. The 3 millimeter Koto core-veneer serves as a tempo storage and enables you to push your opponent into the defense in the twinkling of an eye. Weight approx. 90 g.

TRONUM CARBOTOX OFF

The user of andro® TRONUM ARATOX has just one simple target: Enforcing the direct point! This blade of the category OFF+ is made for hard and uncompromising strokes. Furthermore the player can take advantage of the excellent feedback which is caused by newly developed synthetic fibre Aratox. This material enlarges the sweetspot, distributes the energy to the complete blade and therefore increases control during the stroke. The stable and extra high rebound which is typical for blades with synthetic fibres inside brings the fun factor to its maximum. Weight approx. 90 g

10220202	CONCAVE	
10220203	ANATOM.	€ 59,95

TRONUM ARATOX OFF+

The speed of a blade with synthetic fibre inside combined with the feedback of a pure- wooden blade and on top of that maximum feeling. Impossible? Well, andro® TRONUM CARBOTOX makes it possible! The answer to the riddle is the newly developed synthetic fibre Carbotox which is installed directly underneath the outer plies. Its special structure and the fact that it is slightly thinner than common synthetic fibres provides this blade with a unique feeling – Difficult speed variations without losing control. A high flying curve lets dreams and effective topspins come true! Weight approx. 90 g

10220102	CONCAVE	
10220103	ANATOM.	€ 59,95

SPECIAL EFFECTS: TRONUM

SUPER CORE CELL: ALL IN.

The handle's foam chamber is parted into small cells resulting in a more precise absorption of vibration and creating counter-energy for the next stroke. The 360° veneer edge protection prevents from mechanic influences.

CELL OFF+

The SUPER CORE CELL OFF+ is a very fast offensive blade, yet it is easy to play with. It requires the player's full commitment to completely activate the blade's speed resources. The CELL OFF+ provides very good elasticity and control with clearly more power in every ball. The strengthened fibres of the 7-layered veneer construction releases energy more efficiently. Also balls that are not hit in the centre will be equipped with sufficient power due to the bigger sweetspot - recommended for a very offensive playing system. Weight approx. 85 g.

10225501	STRAIGHT	
10225502	CONCAVE	
10225503	ANATOM.	€ 39,95

CELL CARBON OFF

By the use of Hi-Tec carbon fibres the andro® product developers could build a blade which conveys a solid stiffness but does not yet feel too hard - ball feeling par excellence! The carbon-nano strings cause an even better sound when hitting the ball. The excellent plywood combination provides much more speed than similar carbon blades so far. This results in more stability, fewer vibrations in the blade and better control. The CARBON OFF is slightly top-heavy with a medium ball flying curve. Players with high technical skills willing to take risks will get enthusiastic! Weight approx. 85 g.

10222101	STRAIGHT	
10222102	CONCAVE	
10222103	ANATOM.	€ 69,95

CELL OFF

The thin outer veneers have a particularly positive impact in this OFF version and create a higher rebound effect. With this blade the player chooses a fantastic composition of speed and control features. The ideal equipment for the variable playing system. The special Super Core CELL feeling and the higher ball bounce allow well-placed strokes also from half-distance. Compared to its predecessor the ball flying curve is significantly higher and therefore the CELL OFF is easy to manage also for players with average practice efforts. The low weight makes it very gentle in terms of arm and wrist exposure. Weight approx. 85 g.

10223301	STRAIGHT	
10223302	CONCAVE	
10223303	ANATOM.	€ 39,95

CELL ALL+

With this 7-layer Allround+ blade andro® has created a powerful blade with strengthened fibre layers. The basic idea for this blade's construction was finding a perfect mix of comfortable playing, low mistake level and top technique. Playing the CELL ALL+ every stroke gives the impression of having hit the ball just perfectly in the centre of the blade. The inner veneers are thinner than in the ALL version which results in a very soft feeling. The CELL ALL+ adds more continuity to the play and transmits a feeling of perfect control. The high ball flying curve improves control. Weight approx. 90 g.

10222301	STRAIGHT	
10222302	CONCAVE	
10222303	ANATOM.	€ 39,95

CELL OFF-

The CELL OFF- combines the power of an offensive blade with the fantastic feeling for the ball known from an allround wood – therefore the ideal choice for many players. Though the OFF- is relatively fast you will never have the feeling of losing control of the ball. This enables to comfortably reliable blocks without the loss of speed especially in the passive play. A change-over to active top spins happens easily because the high base speed reduces work. The innovative small cells within the grip system filled with special foam maximise the feeling for the ball and further help to decrease the error rate for strokes hit under time pressure. The perfect blade for the sportive offensive athlete. Weight approx. 80 g.

10223201	STRAIGHT	
10223202	CONCAVE	
10223203	ANATOM.	€ 39,95

CELL ALL

Who ever tested different allround blades knows that they are not constructed the same at all. Only the exactly correct blade will lead the player to victories. The veneers of the SuperCore CELL Allround have been selected in a way that maximises the mistake tolerance also for balls which are not hit precisely. Compared to conventional allround blades the CELL ALL is made of slightly thicker inner veneers and thus it is more robust. The well-balanced weight provides good control also when a player practises less. The wide range of modern stroke variations can easily be learned with this blade. As the high ball flying curve is very forgiving to mistakes it is the ideal equipment for beginners. Weight approx. 90 g.

FIRE AT WILL!

TEMPER TECH

TEMPER TECH veneers are heated to 150°-230° C for a certain period. During this production step the humidity of the wood disappears permanently. As a result the wood becomes considerably harder, more stable and lighter. After the tempered treatment the wood does not absorb humidity any more so that a negative influence on playing characteristics can be avoided.

TEMPER TECH OFF+

The only TEMPER TECH model with a powerful Limba outer veneer. A blade with extreme dynamic and impressive reserves in speed, especially during all strokes from half-distance. For the confessed offensive player. Weight approx. 85 g.

10226301	STRAIGHT

TEMPER TECH ALL+

Perfect for controlled operating game. Refined by a high-quality Hinoki outer ply. Created for players wanting to play a precise return, even when the ball is not always hit in the centre of the racket. Weight approx. 70 g.

10226001	STRAIGHT	
10226002	CONCAVE	
10226003	ANATOM.	€ 49,95

BLAX OFF

An offensive blade for players that love the inimitable balsa feeling. Within the construction of the wood explosive power is hiding, only waiting to be released – this can be felt by a slight top-heaviness. Ideal ball feeling experience despite the low weight. The 6-mm thick balsa centre is strutted with 22 ajoin cross veneers to promote the energy transfer. Hardly any variation mistakes with difficult strokes. An excellent recommendation for players from mid to high playing levels. Weight approx. 78 g.

10223101	STRAIGHT	
10223102	CONCAVE	
10223103	ANATOM.	€ 39,95

BLAX ALL+

The BLAX ALL+ is a very light-weight all-round blade with a balsa centre of 4,5mm thickness. The super-soft playing perception combined with very good speed features are the best prerequisites for a successful all-round to offensive strategy. The specific characteristics of the BLAX-technology create self-confidence even in tight matches. Very good ball control. Recommended for players of all playing levels. Weight approx. 73 g.

PARADE DEF

There are not many noteworthy defense blades in the table tennis market. The andro® research team has lined up to introduce a further notable blade: andro® PARADE DEF! The thin and utmost fine blade construction enables precise and dreamlike counters against topspin attacks. Handle measures have been worked over and adjusted to a defense player's requirements whilst the blade sheet has a perfect length-width-relation. Through the blade geometry's optimization PARADE DEF provides an enlarged sweetspot and perfect balance. The blade masters opponents' strokes superbly until you get the chance to break away from defense to attacking. In this position the blade provides all its secureness to make your attack a successful one. A real highlight among defensive blades of the modern era! Weight approx. 90 g.

FIBERCOMP DEF

The magic weapon for defensive players searching for outstanding control! If you combine this 7-layer DEF plywood with long pimple out rubbers you can easily play dangerous stop blocks right behind the net. Further the FIBERCOMP enables you to play "flutter balls" with a high disruption factor. Dependent on the situation it is - specifically due to the blade construction strengthened by two glass fibre veneers - possible to switch immediately to offensive playing. In the defence play this high class plywood technology has an excellent spin reversal. Due to its balsa core the blade is light-weight and provides an ideal ball feedback. The blade design is around 156mm with an extra large sweetspot that minimises the mistake level! Weight approx. 85 g.

THE NIGHTMARE OF YOUR OPPONENT

It is lightweight. It looks good. It causes respect and you can nearly smell the cold sweat of your opponents. With the andro® NIGHTMARE you have a blade for snuffing out your opponents from the table. Our andro® coaches have helped to develop this high-end blade. Handles for smaller hands in straight, flair and anatomic. All this in line with the technology of our best blades! An to the hand! adjusted blade plane and a resulting lighter weight (approx. 75 g.) round up the profile of this blade for young tournament players like you. Talented players like you do not have opponents anymore - just victims!

NIGHTMARE OFF

The offensive version of andro® NIGHTMARE blades, developed for the talented and advanced "Youngster". Hard outer plies made of Koto wood (very popular also amongst the stars of the table tennis scene) provide more speed without losing sight of control and feeling. The remarkable bigger sweetspot forgives mistakes and supports the player in fiddly situations. Weight approx. 75 g.

SUCCESS STORIES

BY andro®

CHARTRES ASTT

The Chartres ASTT team is one of the biggest success stories in French table tennis in recent years. After having accomplished going up to the Pro A, the French Elite League, nowadays there is no way around this top club. Success came with andro® pro-star Damien Eloi, who joined Chartres in 2009. After a short orientation period the club under president Loic Brehu quickly succeeded big by winning the ETTU Cup 2011 and the French Championship 2011/2012. For two years, the team has established itself under the European top table tennis teams. After reaching the semi-finals in 2012 and the finals in 2013 in the European Champions League team Chartres has firmly established. Along all this successes the French top team puts its trust in andro® equipment.

www.chartres-astt.fr

For the 24th consecutive year Borussia Düsseldorf and andro® organize the andro® Kids Open hand in hand. Initiated in 1988 this outstanding youth cup is an integral part of the tournament scene since years.

Key data for the traditional event, which attracts participants from all around the world year by year are overwhelming: 1.363 youngsters participated the andro® Kids Open 2012. The table tennis enthusiastic children partly travel long distances to compete with other talents on 80 andro® tables. In 24 competition categories each age group's best is wanted who may end up taking medals and great andro® prizes home. This way andro® and Borussia Duesseldorf are significantly promoting young talents on their way up. Also andro® star Christian Suess has achieved his first successes at the andro® Kids Open. Undoubtedly, the andro® Kids Open is the biggest junior tournament in Europe. More information and entry forms under www.kids-open.borussia-duesseldorf.com kids-open@borussia-duesseldorf.com

Another successful partnership between andro® and Borussia Dusseldorf is the andro® TT school since many years. Train where the pros live. www.tt-schule.borussia-duesseldorf.com

DRESS-CODE

FUNCTION, PERFORMANCE, STYLE

QUICK DRY FINISH

The new Quick Dry Finish is an effective finishing of our functional fibers increasing the capillary effect of the fibers. Sweat by physical strain is transported significantly faster from the skin's surface to the outer textile area, where it evaporates. Each fiber itself does not absorb any humidity, thereby obtaining full breathability. The result is a pleasant dry wearing comfort.

indoorDRY STRETCH

Maximum freedom of movement and highest wearing comfort characterize indoorDRY STRETCH best. The special fibre composition provides highest elasticity and tear-resistance. The spandex contingent serves lightweight wearing comfort and long lasting shape-retention.

indoorDRY INTELLIGENT

NEW - the andro® microfibre that thinks ahead. The innovative multi-channel structure absorbs and transports humidity faster and even more effective. The smooth textile-pores immediately react to humidity and forward the wet to the outside by its many cross-linked weave-channels. Hereby a maximum of freshness and breathability can be sustained.

indoorDRY INTELLIGENT

indoorDRY is a functional fabric made from superior polyester fibres developed for the needs of indoor sports. The very breathable polyester fibres transport in the same time up to 50% more humidity away from the skin to the fabric's outside than cotton. This means that sweat evaporates faster. Player's performance capability sustains.

indoorDRY STRETCH microfiber HighTech polo with excellent breathability through Quick Dry finish

Quick-drying functional fabric with Coolmax share. Stylish flatlock seams, large side mesh panels regulate moisture transport.

PLAY

GUARANTEED AVAILABILITY → 07_2015

Nothing is certain but change – this also applies to table tennis teams. We know that players change teams and teams get new members consistently. In order to present a consistent and cohesive club appearance in the present and into future years andro® will guarantee availability of its collections for years to come. Information relating to exact availability details can be obtained from any specialist andro® dealer.

Not only is the functionality pathbreaking, but also the standard for environmental compatibility. Hence andro® only goes for eudermic textiles tested for harmful substances.
